

Real Results

- Thousands of students deployed in rich multi-media learning
- Selective Designer Interfaces for different developer preferences
- Cost Effective On Demand delivery insures short time to market and high ROI
- 20+ Years of content development expertise delivers best practices based quality and productivity.

COURSE AUTHORIZING AND DELIVERY FOR PRODUCTIVITY AND LEARNING

EdWay's multimedia, interactive learning environment allows learners to complete courses by watching video, interacting with course material, and completing self-assessment modules.

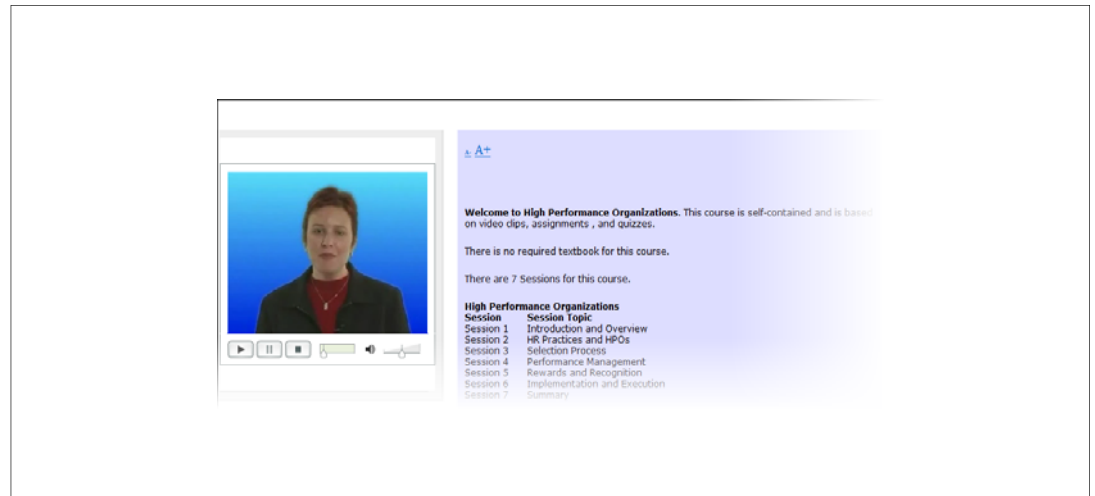

EdWay's eLADS™ multimedia, interactive learning environment utilizes state of the art technology and allows the learner to control the learning environment by accessing courses, anytime, anywhere through a web-based browser. Courses can be completed at the learner's pace, on demand, to meet personalized learning objectives.

Drag n' Drop Visual Interface for graphical course development

EdWay's eLADS™ is a fully hosted, branded, on – demand online learning delivery system with

administrative and technical support, customer access to personalized data and progress reports. Standard components include rich assessment components, high levels of interaction, scalable to serve thousands of learners, adaptive to all types of curricula at all levels 24/7/365

Rich Media Support

ARCHITECTED FOR THE WEB 2.0 ERA

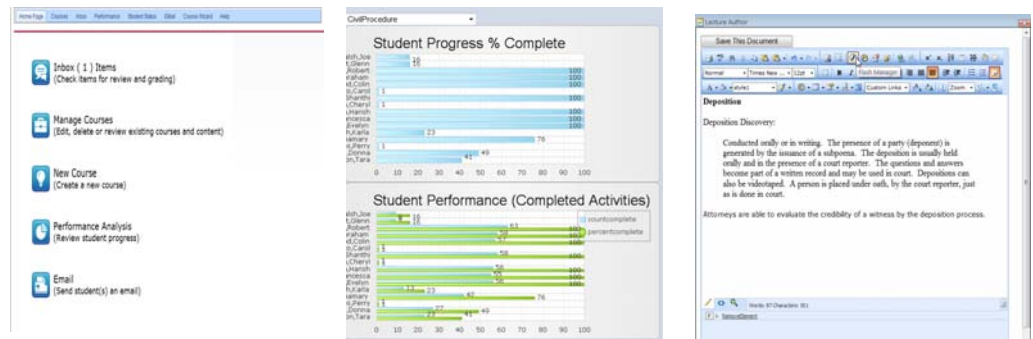

Technical Excellence in design and architecture provides numerous customer benefits:

- Ease of integration with current and future systems
- Ease of transition from legacy LMS systems.
- High Performance and predictable scalability.
- Broad support for emerging technology standards and technologies.
- Unmatched support for cross-platform multimedia objects.
- Fast Instructor proficiency through the use of highly responsive and interactive components.

Technical Highlights

- On Demand browser-based solution
- Scalable enterprise configurations
- ASP.NET 2.0, C#, XML
- Microsoft SQL Server 2000/2005/Express
- AJAX used extensively for the most responsive interface
- Rich Multimedia support— Audio (MP3, WAV), Video (WMV, WMA, MPEG2, QuickTime, Flash Video, Silverlight etc.
- 128-bit strong encryption/SSL 3.0
- Automated data integration via File, RDBMS, HTTP, Web Services

HIGH PERFORMANCE HTML/AJAX INTERFACE

FULL FEATURED LMS

Course Authoring

- WYSIWYG Content Authoring
- Visual Drop and Drop Design
- Rich Multimedia Support
- Real Time Preview of all Course Objects

Assessment Module

- Full host of question types
- Automated Grading/Scoring
- SCORM/AICC Export

Discussion Facility

- Comprehensive control
- Multi-lingual spell checker
- Multiple attachments support
- Full-Text Search

Reporting and Performance

- Comprehensive Reporting
- Dynamic Charting
